

SPRAY GUNS

521339

518992

520090

GENERAL DESCRIPTION

The Magnaflux® LPI System Hand Sprayers are designed to help simplify and expedite your penetrant inspection process. They provide even, controlled application of penetrants, developers, cleaners and water rinse used in the liquid penetrant inspection process. Manufactured from high-quality materials and components, they will deliver years of trouble free performance under all usage situations.

Part Numbers:

521339: The Magnaflux® Dry Developer Spray Gun is a manual spray gun that delivers a light, even dry developer coating. It uses shop compressed air (dry), features mix, jet and spread controls and has one quart capacity.

518992: The Magnaflux® Hydro-Wash Spray Gun is designed for pre and post rinsing of water-wash or post-emulsifiable penetrant system parts. Its air injection boosts velocity to permit faster rinsing of hollow or rough surface parts. This applicator is advantageous for areas with low or fluctuating water pressure.

520090: The Magnaflux® Water Spray Gun is designed for pre and post rinsing of water-wash or post-emulsifiable penetrant system parts. It provides optimal coarse spray in a 45 degree fan pattern to help prevent part over-washing.

SPECIFICATIONS COMPLIANCE - DRY DEVELOPER

ASTM E1417/E1417M-13 (Sections 7.3.1.1, 7.3.2.2, 7.3.4.1)
