## C4 Nomad-GO LED UV-A Beam Profile

## Nomad-GO LED White Light Profile

////////// 1-Year Warranty //////////

REL's C4 Nomad-GO integrates both UV-A and White LED emitters. The cordless Nomad-GO provides a highly maneuverable lightweight solution that allows operator flexibility with rechargeable COTS batteries. The Nomad-GO includes two 18V, 2-Amp Hour lithium ion batteries to enable continuous use.

The C4 Nomad-GO is designed for Fluorescent Penetrant Inspection (FPI) and Magnetic Particle Inspection (MPI). REL's C4 Nomad-GO Inspection Lamp contains high flux UV-A and White LED emitters with built-in static-electric discharge circuits. The C4 Nomad-GO provides a 9-inch diameter of UV-A wavelength emission with an intensity greater than 1000  $\mu\text{W}/\text{cm}^2$  at 15 inches. The UV-A Lamp integral filter limits the visible light to less than 20 lux (1.86 foot-candles) at 15 inches and less than 5 lux (0.47 foot-candles) at 36 inches. The White LED emitter provides more than 700 foot-candles at 15 inches. The lamp's electrical components are sealed and passively cooled within an engineered finned housing manufactured from military grade aluminum. The lamp will perform in the harshest environments.
