

BOGEN TRIPODS

3001 TRIPOD

Bogen's smallest, lightest tripod, yet one of their most versatile. It sets up quickly and easily. Legs feature three click stop spread angles. The center post can be inverted for shooting at ground level, while the legs can be independently adjusted for ultimate versatility. This combination of light weight and versatility make the 3001 the perfect tripod for the XR150. PN 4053001

3035 TRIPOD

The 3035 geared center post features an automatic safety lock with push button release and maintains its stability at all heights. Stability is enhanced by independent variable-spread leg braces. The three legs are continuously adjustable in relation to each other. The tripod has a maximum extension of 81 1/4", and can go as low as 16 1/2". PN 4053035 (For use with all Golden Engineering X-ray machines)

TRIPOD BAGS

Heavy-duty Cordura nylon bags with shoulder straps are available for each tripod. The model 3280 bag is for use with model 3001 tripod, and the model 3281 bag is for the model 3035 tripod.
